M/J Foundational Skills in Mathematics 6

2026-2027

Course Code: 1204000T6

Florida's B.E.S.T. Standards Mathematics

First Nine Weeks

45 Days

August 13, 2026 – October 16, 2026

Topic 1: Use Positive Rational Numbers

08/13 – 09/10 (20 Traditional: 10 Block)

Topic 2: Understand Integers and Rational Numbers

09/11 – 10/09 (20 Traditional: 10 Block)

Lessons	Benchmarks	Lessons	Benchmarks
- MDIS: L26: Multiplying Three-Digit Numbers - MDIS: L30: Dividing Three-Digit Numbers - MDIS: L46: Multiplying Two Fractions - MDIS: L50: Dividing Fractions - MDIS: L62: Estimating the Product of a Whole Number and a Decimal - MDIS: L68: Estimating the Quotient of a Decimal and a Whole Number 1-1: Fluently Add, Subtract and Multiply Decimals 1-2: Fluently Divide Whole Numbers and Decimals 1-3: Multiply Fractions 1-4: Understand Division with Fractions 1-5: Divide Fractions by Fractions 1-6: Divide Mixed Numbers 1-7: Solve Problems with Rational Numbers	- MA.6.NSO.2.1 - MA.6.NSO.2.2 - MA.6.NSO.2.3	2-1: Understand Integers 2-2: Represent Rational Numbers on the Number Line 2-3: Absolute Value of Rational Numbers 2-4: Add Integers 2-5: Subtract Integer 2-6: Multiply Integers 2-7: Divide Integers 2-8: Solve Problems with Absolute Value	- MA.6.NSO.1.1 - MA.6.NSO.1.2 - MA.6.NSO.1.3 - MA.6.NSO.1.4 - MA.6.NSO.4.1 - MA.6.NSO.4.2
Topic 3: Use Numeric and Algebraic Expressions (Continued into next quarter)			
10/12 – 11/02 (16 Traditional: 8 Block)			
Lessons		Benchmarks	
<u>1st 9-Weeks Content</u> - MDIS: L51: Estimating Products and Quotients of Mixed Numbers 3-1: Understand, Represent, and Evaluate Exponents 3-2: Find Greatest Common Factor and Least Common Multiple <u>2nd 9-Weeks Content</u> 3-2: Find Greatest Common Factor and Least Common Multiple 3-3: Write and Evaluate Numeric Expressions 3-4: Write Algebraic Expressions 3-5: Evaluate Algebraic Expressions 3-6: Apply Properties of Operations: Algebraic Expressions 3-7: Simplify Algebraic Expressions		- MA.6.NSO.2.1 - MA.6.NSO.2.3 - MA.6.NSO.3.1 - MA.6.NSO.3.2 - MA.6.NSO.3.3 - MA.6.NSO.3.4 - MA.6.AR.1.1 - MA.6.AR.1.3 - MA.6.AR.1.4

M/J Foundational Skills in Mathematics 6		2026-2027	Course Code: 1204000T6
Florida's B.E.S.T. Standards Mathematics			
Mathematical Thinking and Reasoning			
Description			
MA.K12.MTR.1.1 Actively participate in effortful learning both individually and collectively.		MA.K12.MTR.2.1 Demonstrate understanding by representing problems in multiple ways.	
Mathematicians who participate in effortful learning both individually and with others: - Analyze the problem in a way that makes sense given the task. - Ask questions that will help with solving the task. - Build perseverance by modifying methods as needed while solving a challenging task. - Stay engaged and maintain a positive mindset when working to solve tasks. - Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: - Cultivate a community of growth mindset learners. - Foster perseverance in students by choosing tasks that are challenging. - Develop students' ability to analyze and problem solve. - Recognize students' effort when solving challenging problems.		Mathematicians who demonstrate understanding by representing problems in multiple ways: - Build understanding through modeling and using manipulatives. - Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. - Progress from modeling problems with objects and drawings to using algorithms and equations. - Express connections between concepts and representations. - Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: - Help students make connections between concepts and representations. - Provide opportunities for students to use manipulatives when investigating concepts. - Guide students from concrete to pictorial to abstract representations as understanding progresses. - Show students that various representations can have different purposes and can be useful in different situations.	
MA.K12.MTR.3.1 Complete tasks with mathematical fluency.			
Mathematicians who complete tasks with mathematical fluency: - Select efficient and appropriate methods for solving problems within the given context. - Maintain flexibility and accuracy while performing procedures and mental calculations. - Complete tasks accurately and with confidence. - Adapt procedures to apply them to a new context. - Use feedback to improve efficiency when performing calculations. Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. - Offer multiple opportunities for students to practice efficient and generalizable methods. - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

YEAR-AT-A-GLANCE**

M/J Foundational Skills in Mathematics 6		2026-2027	Course Code: 1204000T6
Florida's B.E.S.T. Standards Mathematics			
Mathematical Thinking and Reasoning			
Description			
MA.K12.MTR.4.1 Engage in discussions that reflect on the mathematical thinking of self and others.		MA.K12.MTR.5.1 Use patterns and structure to help understand and connect mathematical concepts.	
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: - Communicate mathematical ideas, vocabulary and methods effectively. - Analyze the mathematical thinking of others. - Compare the efficiency of a method to those expressed by others. - Recognize errors and suggest how to correctly solve the task. - Justify results by explaining methods and processes. - Construct possible arguments based on evidence. Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. - Create opportunities for students to discuss their thinking with peers. - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. - Develop students' ability to justify methods and compare their responses to the responses of their peers.		Mathematicians who use patterns and structure to help understand and connect mathematical concepts: - Focus on relevant details within a problem. - Create plans and procedures to logically order events, steps or ideas to solve problems. - Decompose a complex problem into manageable parts. - Relate previously learned concepts to new concepts. - Look for similarities among problems. - Connect solutions of problems to more complicated large-scale situations. Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: - Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. - Support students to develop generalizations based on the similarities found among problems. - Provide opportunities for students to create plans and procedures to solve problems. - Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.	
MA.K12.MTR.6.1 Assess the reasonableness of solutions.		MA.K12.MTR.7.1 Apply mathematics to real-world contexts.	
Mathematicians who assess the reasonableness of solutions: - Estimate to discover possible solutions. - Use benchmark quantities to determine if a solution makes sense. - Check calculations when solving problems. - Verify possible solutions by explaining the methods used. - Evaluate results based on the given context. Clarifications: Teachers who encourage students to assess the reasonableness of solutions: - Have students estimate or predict solutions prior to solving. - Prompt students to continually ask, "Does this solution make sense? How do you know?" - Reinforce that students check their work as they progress within and after a task. - Strengthen students' ability to verify solutions through justifications.		Mathematicians who apply mathematics to real-world contexts: - Connect mathematical concepts to everyday experiences. - Use models and methods to understand, represent and solve problems. - Perform investigations to gather data or determine if a method is appropriate. - Redesign models and methods to improve accuracy or efficiency. Clarifications: Teachers who encourage students to apply mathematics to real-world contexts: - Provide opportunities for students to create models, both concrete and abstract, and perform investigations. - Challenge students to question the accuracy of their models and methods. - Support students as they validate conclusions by comparing them to the given situation. - Indicate how various concepts can be applied to other disciplines.
